LOGO DESIGN

₹7,000 - ₹10,000

At Walktopus, we believe a professional logo design goes far beyond simply drawing an attractive graphic. As the visual cornerstone of your brand's identity, our design process is highly strategic. We work closely with you to translate your company's mission, values, and target audience into a unique, memorable symbol and typographic system that functions flawlessly across all mediums—from a tiny website favicon to a massive physical billboard.

STANDARD FEATURES :-

Every brand is unique, but our commitment to quality remains consistent. Our standard Walktopus logo design packages include the following core features:

Discovery & Briefing: We start with an in-depth consultation and questionnaire to deeply understand your business model, competitors, target demographic, and visual preferences.

Mood Boards & Strategy: Before we sketch a single line, we present visual collages to align on the artistic direction, color psychology, and overall aesthetic vibe.

Initial Concepts: The Walktopus design team will present 3 to 5 distinct logo concepts. These represent entirely different strategic directions tailored to your brief.

Revision Rounds: We include 2 to 3 rounds of revisions on your chosen concept, allowing us to collaboratively refine the colors, fonts, spacing, and proportions until it is perfect.

Comprehensive File Formats: Your final logo is delivered in all industry-standard formats. This includes infinitely scalable vector files (AI, EPS, SVG) for print and large-scale use, as well as raster files (PNG, JPG) for everyday digital applications.

Walktopus Brand Guidelines: A comprehensive style guide detailing exactly how your new logo should be used. It establishes your official color palettes (CMYK, RGB, HEX), typography rules, minimum size requirements, and clear-space guidelines to maintain brand consistency.

TERMS & CONDITIONS

- To ensure a smooth, professional, and transparent collaboration, Walktopus operates under the following standard terms and conditions:
- **Payment Structure:** A non-refundable upfront deposit of 50% is required before any design work commences. The remaining 50% balance is due immediately upon final approval and prior to the release of the final source files.
- **Scope Creep & Extra Revisions:** Our agreements explicitly cap the included revision rounds. Any design requests or additional concepts beyond this limit will be billed at our standard hourly rate or a predetermined flat fee.
- **Intellectual Property (IP) & Copyright:** Walktopus (operating as a fully-owned subsidiary of DGEN Technologies Private Limited) retains full ownership of all unused draft concepts, preliminary sketches, and working files. Full copyright of the final, approved logo is officially transferred to the client only upon receipt of full and final payment.
- **Portfolio Rights:** Walktopus reserves the right to showcase the finalized logo, alongside case studies of the design process, in our portfolio, website, and social media channels for promotional purposes.
- **Client Responsiveness:** Timely feedback is crucial. Clients are requested to provide feedback within 7 to 10 business days of receiving concepts or revisions. If communication lapses for more than 30 days, Walktopus reserves the right to declare the project abandoned, retain the deposit, and close the account.
- **Termination:** Should the client choose to cancel the project prior to completion, they are obligated to pay for all hours worked up to that point. In the event of cancellation, the deposit is forfeited, and the client receives no rights or licenses to any of the preliminary work created by the Walktopus team.

BASIC BRANDING KIT

₹12,000 - ₹19,000

While a great logo is the face of your business, a branding kit is its wardrobe. At Walktopus, our Basic Branding Kit service provides the essential visual foundation your company needs to look professional, cohesive, and recognizable across every touchpoint. Rather than just handing you a logo and wishing you luck, we equip you with a standardized system—including primary and secondary logo variations, a defined brand color palette, and corporate typography pairings—ensuring your brand speaks with one unified visual voice.

STANDARD FEATURES :-

Our Basic Branding Kit is designed to give you all the fundamental tools necessary to launch or refresh your brand with confidence. The package includes:

Primary Logo Design: The main, fully-rendered logo that serves as the primary identifier for your brand, used in the most prominent placements.

Secondary & Alternate Logos: We provide adaptable variations of your main logo (such as a stacked version, a horizontal version, or a simplified icon/favicon) to ensure your branding fits perfectly into any space, from wide website headers to square social media profiles.

Monochrome Variations: Black, white, and single-color versions of your logos, essential for simplified printing, watermarking, or contrasting backgrounds.

Defined Brand Color Palette: A carefully selected array of primary and secondary brand colors. We provide the exact color codes (HEX for web, RGB for digital, and CMYK for print) so your brand colors remain perfectly consistent whether on a screen or a business card.

Corporate Typography Pairings: We select and pair 2 to 3 fonts (typically a heading font, a body font, and an accent font) that complement your logo and tone. We also recommend web-safe alternatives where necessary.

Basic Style Board: A consolidated 1-2 page PDF reference sheet (like the image above) that displays all your brand assets, colors, and fonts in one place for quick reference by your internal team or future vendors.

TERMS & CONDITIONS

- To ensure a smooth delivery of your brand assets, Walktopus operates under the following standard terms for our Branding Kit services:
- **Payment Structure:** A non-refundable upfront deposit of 50% is required to initiate the project. The final 50% is due upon your approval of the brand board, immediately prior to the handover of all high-resolution and vector source files.
- **Included Revisions:** The Basic Branding Kit includes up to 3 rounds of revisions during the initial conceptual phase. Once the primary logo is approved, we build out the rest of the kit (colors, typography, alternate layouts). Requests for revisions beyond the included rounds are billed at our standard hourly rate.
- **Intellectual Property (IP) & Copyright:** Walktopus (operating as a fully-owned subsidiary of DGEN Technologies Private Limited) retains ownership of all working files and unselected concepts. The full copyright and usage rights of the finalized branding kit assets are transferred to the client exclusively upon receipt of final payment.
- **Font Licensing:** While Walktopus selects and defines the typography pairings, the client is responsible for purchasing any necessary commercial licenses for premium fonts, should they wish to install and use those specific fonts on their own internal computers. (We frequently use high-quality, open-source fonts to avoid this extra cost for clients when possible).
- **Portfolio Rights:** Walktopus reserves the right to display the finalized branding kit and style boards in our portfolio and marketing materials.
- **Client Responsiveness:** Timely collaboration keeps the project on track. We ask for feedback within 7 to 10 business days per milestone. Extended delays in communication (over 30 days) may result in the project being marked as abandoned, with the deposit retained.

BRAND IDENTITY KIT

₹25,000 - ₹32,000

At Walktopus, we know that building trust requires absolute consistency across every single customer touchpoint. While a basic kit gives you the foundational visual elements, our Brand Identity Kit is the ultimate, comprehensive brand bible. This premium service is designed for businesses ready to scale, providing not just the logos and colors, but the exhaustive guidelines, physical stationery layouts, and digital templates required to ensure your brand is represented flawlessly, no matter who is creating your content.

STANDARD FEATURES :-

This all-inclusive package builds upon our foundational branding work to deliver a robust, ready-to-use suite of assets. The Walktopus Brand Identity Kit includes:

Everything in the Basic Kit: Primary and secondary logo designs, monochrome variations, defined brand color palettes (CMYK, RGB, HEX), and corporate typography pairings.

Exhaustive Brand Guidelines (The Brand Bible):

A comprehensive, multi-page document that dictates exactly how your brand should be used. It covers logo clear-space rules, "do's and don'ts" of logo application, photographic and imagery direction, and even guidelines for your brand's tone of voice.

Stationery Design: Print-ready, professionally designed layouts for your physical business needs. This typically includes double-sided business cards, corporate letterheads, and standard envelope designs tailored to your new visual identity.

Digital Asset Templates: Ready-to-use templates for your online presence to maintain visual harmony. This includes custom email signatures, social media profile/cover images, and a set of editable social media post and story templates (often delivered in Canva or Figma for your team's easy daily use).

Presentation Deck Styling: A customized master template (for PowerPoint or Google Slides) featuring a title slide, content slides, and a closing slide, ensuring your sales pitches and internal meetings look polished.

TERMS & CONDITIONS

- Given the depth and scale of a complete identity build out, Walktopus applies the following terms to ensure a structured and successful project delivery:
- **Payment Structure:** A non-refundable upfront deposit of 50% is required before strategy and design commence. The remaining 50% is due upon final approval of the brand guidelines and prior to the release of all high-resolution, vector, and template files.
- **Included Revisions & Scope:** The project includes up to 4 rounds of revisions during the initial logo concept phase, and 2 rounds of revisions for the collateral items (stationery, templates, guidelines). Additional revisions or requests for extra collateral items not defined in the original scope will be billed at our standard hourly rate.
- **Intellectual Property (IP) & Copyright:** Walktopus (operating as a fully-owned subsidiary of DGEN Technologies Private Limited) retains ownership of all preliminary sketches, unused concepts, and raw working files. Full copyright and usage rights of the finalized brand identity kit are transferred to the client exclusively upon receipt of final payment.
- **Printing & Production:** This service covers the design of stationery and marketing materials. The physical printing, manufacturing, and shipping of items (like business cards or letterheads) are not included, though we will provide fully optimized, print-ready files to hand off to the vendor of your choice.
- **Third-Party Licensing:** If the approved brand identity incorporates premium commercial fonts or specific stock photography, the client assumes responsibility for purchasing the necessary licenses for their own ongoing use.
- **Portfolio Rights:** Walktopus retains the right to feature the completed brand identity, guidelines, and collateral mockups in our agency portfolio and marketing campaigns.
- **Client Responsiveness:** Due to the comprehensive nature of this project, prompt feedback is essential. We require feedback on deliverables within 7 to 10 business days. Extended periods of no communication (exceeding 30 days) may result in project suspension or cancellation, with the initial deposit forfeited.

STATIC WEBSITE

₹14,000 - ₹25,000

At Walktopus, we know that your website is often the first interaction a potential client has with your brand. Our Static Website service is designed to deliver a high-impact, informational digital presence without the bloat of a complex backend system. Because static websites do not rely on database queries, they offer blazing-fast loading speeds, bulletproof security, and a visually striking layout that is perfect for professional portfolios, local businesses, or corporate overviews.

STANDARD FEATURES :-

Our static web development approach prioritizes flawless design, speed, and cross-device compatibility. The standard Walktopus static website package includes:

Custom Responsive UI/UX Design: We do not use generic cookie-cutter templates. We design a tailored user interface that flawlessly adapts to mobile phones, tablets, and desktop monitors.

Essential Page Architecture: Typically a 4 to 6-page structure, strategically designed to guide visitors. This usually includes Home, About Us, Services/Portfolio, and a Contact page.

Blazing-Fast Performance: Because the site relies on pre-rendered HTML, CSS, and JavaScript rather than heavy databases, your site will load almost instantly, severely reducing user bounce rates.

Enhanced Security: With no backend content management system (CMS) or database attached, static websites are virtually immune to standard hacking attempts and SQL injections.

On-Page SEO Optimization: We build your site with clean, semantic code, compressed imagery, and proper meta-tag structuring to ensure search engines can easily crawl and index your business.

Functional Integrations: Secure, spam-protected contact forms routed directly to your business email, integrated Google Maps for local businesses, and seamless social media linking.

TERMS & CONDITIONS

- To ensure your website is developed efficiently and launched on time, Walktopus operates under the following web development terms:
- **Payment Structure:** A non-refundable upfront deposit of 50% is required to secure your spot in our development schedule and initiate the design phase. The remaining 50% balance is due upon final approval of the staging site, immediately prior to pushing the website live.
- **Revisions & Scope Creep:** The project includes up to 2 rounds of revisions during the initial visual mockup phase. Once the design is approved and coding begins, any structural design changes or requests for additional pages will be treated as a change of scope and billed at our standard hourly rate.
- **Content Provision:** The client is responsible for providing all finalized text copy, logos, and high-resolution imagery before development begins. (If you require professional copywriting or stock photography curation, we offer these as separate add-on services).
- **Domain & Hosting Setup:** While the client is responsible for purchasing their own domain name (e.g., yourbusiness.com), Walktopus will handle the technical deployment of the static files to a high-speed hosting provider.
- **Intellectual Property (IP) & Code Ownership:** Walktopus (operating as a fully-owned subsidiary of DGEN Technologies Private Limited) retains ownership of all working design files and unselected layouts. Upon receipt of full and final payment, complete ownership of the final front-end source code (HTML/CSS/JS) is transferred to the client.
- **Maintenance & Post-Launch Support:** Because static websites do not feature a client-facing CMS (like WordPress), you will not be able to log in and change text yourself. We provide a 14-day warranty period post-launch to fix any hidden bugs or display issues. Future text updates, image swaps, or structural changes are billed at our standard hourly maintenance rate.
- **Portfolio Rights:** Walktopus reserves the right to showcase screenshots and case studies of the completed website in our agency portfolio and marketing materials.

DYNAMIC WEBSITE

₹20,000 - ₹35,000

A dynamic website gives you the keys to your own digital kingdom. At Walktopus, we build robust Content Management System (CMS) integrated websites that look beautiful on the front end and are incredibly easy to manage on the back end. This service is designed for growing businesses that need to regularly publish blogs, update team member profiles, post case studies, or manage service listings—all without needing to understand or write a single line of code.

STANDARD FEATURES :-

Our dynamic web development focuses on giving you independence without sacrificing professional design or performance. The standard package includes:

Custom CMS Integration: We build your site on industry-standard, scalable platforms (such as WordPress) customized specifically to fit your business logic and workflow.

User-Friendly Dashboard: A clean, intuitive back-end interface where your team can log in, edit text, upload images, and publish new pages just as easily as using a standard word processor.

Dynamic Content Architecture: We create custom database structures tailored to your needs. Whether that is a "News & Insights" blog, a filterable "Team Directory", or a dynamic "Case Studies" portfolio, adding new entries automatically updates the front-end design perfectly.

Responsive & Scalable Design: Your custom front-end interface will be fully responsive, adapting flawlessly to mobile phones, tablets, and desktops. The architecture is built to scale, allowing your site to grow from 10 pages to 1,000 pages without breaking the layout.

Integrated SEO Framework: We implement dynamic SEO tools (like Yoast or RankMath) so your marketing team can easily control meta titles, keywords, and social sharing images for every new page or post created.

Admin Training & Handoff: We don't just hand over the login credentials and leave. We include a dedicated training session (and a recorded video tutorial) teaching your team exactly how to navigate, update, and manage your specific website safely.

TERMS & CONDITIONS

- Developing a database-driven website involves complex technical integration. Walktopus operates under the following terms to ensure a secure and successful deployment:
- **Payment Structure:** A non-refundable upfront deposit of 50% is required to secure the project timeline and initiate the wireframing phase. The final 50% balance is due upon your approval of the staging site, immediately prior to migrating the site to your live public domain.
- **Included Scope & Revisions:** This project includes up to 2 rounds of design revisions on the core page templates (e.g., Homepage, About, Blog Feed, Single Service Page). Once the design is approved and backend coding begins, structural changes or requests for new dynamic database types are considered scope creep and will be billed at our standard hourly rate.
- **Hosting, Domains & Premium Plugins:** The client is responsible for purchasing their domain name and CMS-compatible web hosting (we will recommend optimal providers). If your site's functionality requires premium third-party plugins (e.g., advanced booking calendars), the client is responsible for purchasing those annual licenses.
- **Intellectual Property (IP):** Walktopus (operating as a fully-owned subsidiary of DGEN Technologies Private Limited) retains ownership of our proprietary backend development frameworks. Upon full and final payment, the client receives complete ownership of the front-end design, the database content, and the website instance.
- **Security & Ongoing Maintenance:** Because dynamic CMS platforms rely on databases, themes, and plugins, they require regular software updates to remain secure from vulnerabilities. We provide a 30-day post-launch warranty for bug fixes. After 30 days, ongoing software updates, database backups, and security patch management are the sole responsibility of the client, unless they opt into a Walktopus Monthly Maintenance Retainer.
- **Portfolio Rights:** Walktopus reserves the right to feature screenshots, links, and case studies of the completed dynamic website in our agency portfolio and marketing materials.

MARKETPLACE WEBSITE

₹40,000 - ₹1,00,000

At Walktopus, we understand that a marketplace or e-commerce platform is more than just a website—it is a comprehensive digital storefront and the core engine of your online business. Our Marketplace Website service is designed to build complex, scalable multi-vendor or direct-to-consumer platforms. We engineer these digital ecosystems to handle heavy traffic, process secure transactions seamlessly, and provide intuitive dashboards for both your users and your administrative team, empowering your business to sell and scale without technical limitations.

STANDARD FEATURES :-

Building an online marketplace requires deep technical expertise and a heavy focus on conversion optimization. Our standard marketplace packages include:

Custom E-Commerce UI/UX: We design high-converting, mobile-first storefronts tailored to your specific product catalog. This includes intuitive search filtering, seamless cart experiences, and frictionless checkout flows to minimize cart abandonment.

Secure Payment Gateway Integrations: We seamlessly integrate trusted, enterprise-grade payment processors (such as Razorpay, Stripe, or PayPal) allowing you to securely accept credit cards, UPI, and digital wallets.

Advanced Inventory Management: A robust backend system to effortlessly add products, manage variations (size, color, etc.), track stock levels in real-time, and set up automated low-stock alerts.

User & Vendor Dashboards: Dedicated portal logins for your customers to track their order history, save wishlists, and manage shipping addresses. For multi-vendor platforms, we build dedicated seller dashboards where independent vendors can upload their own products and track their individual sales metrics.

Master Admin Control Panel: A comprehensive command center for your internal team to oversee all transactions, manage refunds, approve new vendors, and monitor platform-wide analytics and revenue.

Scalable & Secure Architecture: We implement robust security protocols, including SSL certification and data encryption, ensuring your customers' financial data is protected. The underlying architecture is built to scale gracefully as your traffic and catalog expand.

TERMS & CONDITIONS

- Due to the immense technical complexity and security requirements of building a transactional marketplace, Walktopus operates under strict development parameters:
- **Payment Structure:** For projects of this scale, we typically employ a milestone-based payment structure: A non-refundable upfront deposit of 40% is required to initiate strategy and wireframing. 30% is due upon approval of the visual designs and front-end build. The final 30% balance is due upon successful testing on the staging server, immediately prior to the live launch.
- **Strict Scope Definition:** The specific functionalities (e.g., exact shipping calculators, specific discount logic, third-party ERP integrations) must be explicitly defined in the initial contract. Any requests for new logic, API integrations, or architectural changes after development has commenced will be scoped as a separate phase and billed accordingly.
- **Third-Party Fees & Licensing:** The client is entirely responsible for all third-party costs associated with running an e-commerce business. This includes domain registration, premium cloud hosting, SSL certificate renewals, payment gateway transaction fees, and licenses for premium shipping or tax calculation APIs.
- **Legal & Compliance Responsibilities:** Walktopus provides the technical infrastructure. The client assumes all legal responsibility for their marketplace, including drafting their own Privacy Policies, Terms of Service, Return/Refund Policies, and multi-vendor legal agreements.
- **Intellectual Property (IP):** Walktopus (operating as a fully-owned subsidiary of DGEN Technologies Private Limited) retains ownership of proprietary backend development frameworks and unselected design mockups. Upon final payment, the client receives complete ownership of the platform instance, the front-end code, and all associated database content.
- **Security & Ongoing Maintenance:** E-commerce platforms require continuous maintenance to remain secure and functional. Walktopus provides a 30-day post-launch warranty to resolve any immediate bugs. After this period, clients are highly encouraged to enroll in a Walktopus Monthly Maintenance Retainer to ensure critical security patches, payment gateway updates, and database backups are professionally managed.

WEBSITE MANAGEMENT

₹2,999/M

At Walktopus, we know that launching a website is only the beginning. A professional website requires continuous care to remain secure, fast, and functional. Our Website Management plan acts as an insurance policy for your digital storefront. We handle the technical heavy lifting—from installing critical security patches to monitoring your uptime—so you can focus on running your business, knowing your digital presence is in expert hands.

STANDARD FEATURES :-

Our monthly management retainer ensures your website remains healthy, optimized, and up-to-date. The standard Walktopus Website Management package includes:

Core & Plugin Updates: We safely perform all necessary updates to your Content Management System (e.g., WordPress core), themes, and third-party plugins to ensure optimal performance and compatibility.

Proactive Security Patching: We continuously monitor for known vulnerabilities and apply vital security patches to protect your website against malware, spam, and hacking attempts.

24/7 Uptime Monitoring: We implement automated ping monitors that check your website every few minutes. If your site goes offline, our team is instantly alerted so we can investigate and resolve the issue quickly.

Regular Database Backups: We schedule automated, secure backups of your entire website (files and database). If a critical failure occurs, we can restore your site to a previous working version with minimal downtime.

Minor Content Adjustments: We include a set amount of dedicated time each month for minor tasks—such as swapping out a banner image, updating an employee bio, posting a pre-written blog, or changing business hours.

Monthly Health Reports: You receive a consolidated monthly report detailing the updates performed, backup status, security scans, and overall website performance metrics.

TERMS & CONDITIONS

- To provide consistent, high-quality technical support, Walktopus operates under the following service level agreements for our management retainers:
- **Payment & Billing:** The Website Management service is billed on a recurring monthly subscription of ₹2,999. Invoices are generated at the beginning of each billing cycle, and payment is required in advance to maintain uninterrupted support.
- **Scope of Content Adjustments:** The monthly fee includes up to 2 hours of minor content adjustments and basic technical support. Requests that exceed this time limit, or involve structural redesigns, custom coding, or adding entirely new dynamic pages, are considered out-of-scope and will be quoted separately at our standard hourly rate.
- **Non-Rollover Hours:** The allocated support hours are designed for routine monthly maintenance. Any unused time at the end of the billing cycle does not roll over to the following month.
- **Third-Party Costs:** This fee covers Walktopus's labor and monitoring tools. The client remains responsible for all underlying infrastructure costs, including web hosting fees, domain renewals, and the cost of annual licenses for any premium, paid plugins.
- **Liability Limitations:** While Walktopus takes every precaution by backing up the site prior to updates, third-party plugin updates can occasionally cause unforeseen conflicts. Walktopus is not liable for revenue lost during unexpected downtime, but we are committed to using your allocated monthly time to troubleshoot and resolve these conflicts promptly.
- **Cancellation Policy:** This is a month-to-month agreement. Clients may cancel their management subscription at any time by providing a 30-day written notice. Services will continue until the end of the final paid billing cycle, after which all maintenance and monitoring tools will be disconnected.

SOCIAL MEDIA POST (SINGLE)

₹500 - ₹1,500

At Walktopus, we understand that in the fast-paced digital feed, you only have milliseconds to capture a user's attention. Our Single Social Media Post service is designed to deliver a high-impact, scroll-stopping asset tailored for your specific audience. Whether you need a striking single graphic or an educational multi-slide carousel, we combine compelling visual design with strategic copywriting to drive meaningful engagement and push your followers toward conversion.

STANDARD FEATURES :-

We don't just make pretty pictures; we create strategic micro-campaigns. A standard Walktopus single post package includes:

Custom Visual Design: We craft a bespoke, high-quality graphic or an engaging carousel (typically up to 5 slides) that aligns flawlessly with your existing brand identity and color palette.

Platform-Specific Optimization: The design is perfectly sized, formatted, and optimized for your target platform (e.g., 1080x1350 for an Instagram portrait, 1200x627 for a LinkedIn link-share), ensuring no awkward cropping or resolution loss.

Strategic Copywriting: We provide the full package. Alongside the graphic, we write a compelling, conversion-focused caption tailored to your brand voice, complete with an engaging hook and a strong Call-to-Action (CTA).

Targeted Hashtag Research: We include a curated list of relevant, platform-specific hashtags designed to maximize the organic reach and discoverability of your post.

Premium Asset Sourcing: If you do not have your own photography, our team will curate and incorporate high-quality, fully licensed stock imagery to elevate the design.

TERMS & CONDITIONS

- To ensure rapid delivery and a streamlined creative process for one-off assets, Walktopus applies the following terms:
- **Payment Structure:** Due to the low-ticket and fast-turnaround nature of single standalone posts, a 100% upfront payment is required before ideation, design, and copywriting commence.
- **Included Revisions:** The project includes 1 dedicated round of revisions for both the visual graphic and the written caption. Any requests for complete redesigns or additional revision rounds will be billed as a new post or at our standard hourly rate.
- **Turnaround Time:** Standard delivery for a single social media asset is typically 2 to 3 business days from the receipt of payment and any necessary client information (like specific promotional details or logos).
- **Intellectual Property (IP):** Walktopus (operating as a fully-owned subsidiary of DGEN Technologies Private Limited) retains ownership of the raw, layered working files (e.g., PSD or AI files). The client receives full copyright and digital usage rights for the final exported graphics and copy.
- **Publishing & Management:** This service is strictly for content creation. The delivery consists of the finalized image files and a text document containing the caption. The client is responsible for manually logging in and publishing the content, as well as managing community responses, unless they are enrolled in a full-service Walktopus Social Media Management retainer.
- **Asset Provision:** If the design requires specific product photos, headshots, or proprietary graphics, the client must provide these high-resolution assets before the turnaround timer begins.

REEL/SHORTS VIDEO

₹2,000 - ₹8,000

In today's digital landscape, short-form vertical video is the most powerful tool for driving organic reach, engagement, and viral brand awareness. At Walktopus, our Reel/Shorts Video service provides end-to-end production designed to capture short attention spans. We handle everything from the initial script hook to high-energy visual editing and dynamic captioning, creating a polished, platform-native video optimized for Instagram Reels, YouTube Shorts etc.

STANDARD FEATURES :-

We design vertical videos engineered for maximum watch time and algorithm retention. Our production process includes:

Strategic Scriptwriting: We craft a compelling video script featuring a strong, 3-second visual and audio "hook" to prevent users from scrolling past, a clear narrative arc, and a conversion-oriented Call-to-Action (CTA).

Professional Video Editing: Our post-production team handles the pacing, seamless transitions, visual effects, and color grading needed to make your raw footage look premium and cinematic.

Dynamic Animated Captions: We design eye-catching, synchronized, and styled subtitles directly on the screen. This is crucial for performance, as a vast majority of users watch mobile video with the sound turned off.

Trending Audio & Sound Design: We source and integrate platform-native trending music tracks and enhance the engagement with strategic sound effects (whooshes, pop ups, transitions) to emphasize key points.

Pacing & B-Roll Curation: We inject fast cuts, zoom-ins, graphic pop-ups, or fully-licensed stock B-roll to maintain high visual stimulation and boost the video's total watch-time metric.

TERMS & CONDITIONS

- Short-form video relies on swift production and tight post-production editing. Walktopus operates under the following service boundaries:
- **Payment Structure:** A non-refundable upfront deposit of 50% is required to begin the scripting and conceptualization phase. The remaining 50% balance is due upon approval of the watermarked draft, prior to delivering the final high-definition MP4 file.
- **Footage & Asset Provision:** This price range covers post-production editing and creation. The client is responsible for recording and providing the raw footage (e.g., talking-head footage, raw product videos, behind-the-scenes clips) based on the script structure we provide. (If you require a Walktopus videographer to physically shoot footage on-site, a custom production quote will be generated).
- **Included Revisions:** The package includes up to 2 rounds of revisions on the video draft. Revisions apply to text corrections, changing background audio tracks, adjusting cut timing, or swapping a B-roll clip. Completely restructuring the script or changing the core creative concept after filming is completed will incur extra fees.
- **Turnaround Time:** Standard post-production turnaround is 5 to 7 business days from the moment Walktopus receives all the necessary raw footage and approved script confirmations from the client.
- **Intellectual Property (IP):** Walktopus (operating as a fully-owned subsidiary of DGEN Technologies Private Limited) retains ownership of the raw, unrendered video editing timelines (e.g., Premiere Pro or After Effects project files). The client receives full digital usage rights for the final exported high-resolution video file.
- **Platform Compliance & Copyright:** While Walktopus integrates trending music tracks, social media platforms continuously update their music licensing rules. Walktopus is not responsible for any platform-enforced audio muting or copyright restrictions that occur post-upload if the platform rules change.
- **Publishing & Optimization:** Our delivery includes the finished video file and an optimized description with suggested tags. The client is responsible for physically posting the video and managing user engagement, unless they have signed up for a dedicated Walktopus Social Media Management package.

CONTENT CALENDER

₹4,000 - ₹7,000

Consistency is the secret weapon of digital marketing, but consistency requires a plan. At Walktopus, our Content Calendar service delivers a comprehensive, 30-day strategic blueprint designed to remove the daily guesswork from your social media presence. We analyze your target audience, industry trends, and business objectives to map out a full month of highly targeted content. This package equips your in-house marketing team with the exact structure, visual directions, and posting schedules they need to execute an organized, professional campaign seamlessly.

STANDARD FEATURES :-

We map out a cohesive brand story across the entire month. The standard Walktopus Content Calendar package includes:

Comprehensive 30-Day Grid: A detailed calendar matrix covering a full month, cleanly organizing your publishing dates, target social media platforms, and distribution cadence.

Strategic Content Pillars: We establish core content themes (e.g., educational, promotional, behind-the-scenes, social proof) tailored to your industry to ensure your feed remains balanced and engaging.

Detailed Post Concepts & Hooks: Every single calendar slot includes a concrete topic definition, a compelling creative angle, and a platform-native "hook" to maximize reader retention.

Visual & Aesthetic Direction: We outline the exact visual approach required for each post—specifying whether it should be a single graphic, a carousel, a short-form vertical video, or curated photography—alongside layout and framing suggestions.

Optimal Posting Schedules: We utilize audience analytics and platform performance data to dictate the exact days and times your content should go live to capture peak user traffic.

Strategic Caption Outlines & Hashtag Pools: We provide clear copywriting briefs or outline frameworks for every post, alongside platform-specific, researched hashtag clusters to boost organic discoverability.

TERMS & CONDITIONS

- A content calendar acts as a master blueprint for execution. To ensure an efficient and structured strategy phase, Walktopus operates under the following terms:
- **Payment Structure:** A non-refundable upfront deposit of 50% is required to schedule your strategic briefing and initiate audience research. The remaining 50% balance is due upon your approval of the final strategy document, immediately prior to delivering the fully editable calendar dashboard.
- **Included Revisions:** The package includes up to 2 rounds of revisions on the initial draft of the calendar. Revisions apply to shifting publication dates, tweaking post concepts, or adjusting content pillar distributions. Once the calendar is finalized, any mid-month changes due to sudden shift in corporate promotions will be treated as an out-of-scope amendment.
- **Content Creation Exclusions:** This service is strictly for strategy, scheduling, and conceptual planning. The final deliverable is an organized digital master calendar (typically hosted on Notion, Trello, or Google Sheets). It does not include the physical creation of graphic designs, video editing, or finalized long-form captions, which are available as separate creative packages.
- **Turnaround Time:** Crafting a deep, data-driven strategy takes time. Standard delivery for a complete 30-day calendar is 7 to 10 business days following the completion of your initial discovery briefing and the receipt of your internal marketing goals.
- **Intellectual Property (IP):** Walktopus (operating as a fully-owned subsidiary of DGEN Technologies Private Limited) retains ownership of our proprietary strategic templates, competitive frameworks, and unselected concept briefs. Upon full payment, the client receives exclusive rights to use and execute the specific 30-day calendar content plan.
- **Execution & Analytics:** Because this service is designed to empower your in-house marketing personnel, Walktopus assumes no responsibility for the physical uploading, scheduling, community management, or organic reach performance metrics resulting from the calendar's execution.
- **Portfolio Rights:** Walktopus reserves the right to display high-level strategy summaries, content pillar frameworks, and anonymized calendar structures in our agency portfolio and case studies.

SOCIAL MEDIA AUDIT

₹3,000 - ₹6,000

If your social media efforts feel like screaming into a void, it is usually because of a hidden algorithmic or strategic bottleneck. At Walktopus, our Social Media Audit is a deep-dive analytical review of your current digital footprint. We don't just look at vanity metrics like follower counts; we dissect your engagement rates, audience demographics, content performance, and competitor positioning. The final deliverable is an actionable, data-backed roadmap designed to fix what is broken and immediately accelerate your organic growth.

STANDARD FEATURES :-

Our audit combines rigorous data extraction with expert strategic analysis. The standard Walktopus Social Media Audit covers:

Profile Optimization Analysis: A complete evaluation of your current bios, profile images, cover art, links, and highlights across all active platforms to ensure maximum conversion from casual profile visitors to followers.

Content & Format Performance Review: We audit your past 30 to 90 days of content to identify exactly which formats (e.g., carousels, static images, vertical videos) are driving traffic and which ones are wasting your team's time.

Engagement & Audience Metrics Deep-Dive: An analysis of your true engagement rate, comment-to-like ratios, and audience retention metrics to diagnose if your content is genuinely resonating with the platform algorithms.

Competitor Benchmarking: We evaluate 2 to 3 of your direct competitors to identify gaps in their content strategy that your brand can exploit, mapping out what is working in your specific industry.

Bottleneck Identification: We pinpoint the exact roadblocks stalling your growth—whether it is poor hook selection, wrong publishing times, disconnected hashtags, or inconsistent visual branding.

Actionable Growth Roadmap: A comprehensive, easy-to-read PDF report detailing our findings, paired with a concrete, prioritized list of structural and creative changes your team can implement immediately.

TERMS & CONDITIONS

- To maintain a highly analytical framework and deliver objective strategic insights, Walktopus operates under the following service terms:
- **Payment Structure:** Due to the intensive research, data gathering, and rapid delivery timeline of this standalone consulting service, a 100% upfront payment is required before we begin pulling analytics data.
- **Account Access Requirements:** To conduct a thorough audit, the client must safely grant Walktopus temporary "Viewer" or "Analyst" access to their social media native dashboards (such as Meta Business Suite, LinkedIn Analytics, or YouTube Studio). We will never ask for your primary account passwords.
- **Included Revisions:** A Social Media Audit is an objective, data-driven expert analysis rather than a collaborative creative project. Therefore, it does not include revision rounds. However, we include a 30-minute post-delivery consultation call to walk through the report and answer any clarity-seeking questions your team might have.
- **Exclusion of Execution:** This service is strictly an interpretive, analytical, and strategic reporting service. It does not include active community management, content creation, profile updating, graphic designing, or ad campaign execution.
- **Turnaround Time:** Deep-diving into raw data takes precision. A complete Walktopus Social Media Audit report is delivered within 5 to 7 business days from the moment full platform data access and competitor details are provided by the client.
- **Intellectual Property (IP):** Walktopus (operating as a fully-owned subsidiary of DGEN Technologies Private Limited) retains ownership of our proprietary audit frameworks, analytical spreadsheets, and data evaluation methodologies. The final customized PDF report and roadmap belong entirely to the client for internal execution.
- **Performance Disclaimer:** Social media platform algorithms change constantly. While our roadmaps are built on proven data and industry best practices, Walktopus cannot legally guarantee specific follower increases or viral success, as actual results depend entirely on how consistently and accurately your in-house team executes the recommended roadmap.

AD CAMPAIGN SETUP

₹5,000 - ₹15,000

Running digital ads without a proper foundation is the fastest way to burn through your marketing budget. At Walktopus, our Ad Campaign Setup service acts as the technical bridge between your brand and your target customers. We handle the complex backend architecture—from precision audience targeting and pixel installation to structuring campaign hierarchies across Meta (Facebook/Instagram), Google, or LinkedIn ad networks. We ensure that when you finally flip the switch and start spending money, your ads are delivered to the right people, at the right time, with perfect tracking in place.

STANDARD FEATURES :-

A successful ad campaign requires meticulous technical setup before a single image is ever published. The standard Walktopus Ad Campaign Setup package includes:

Pixel & Tracking Installation: We install and verify the necessary tracking codes (Meta Pixel, Google Tag Manager, LinkedIn Insight Tag) on your website. This is essential for tracking user behavior, measuring conversions, and enabling powerful retargeting campaigns.

Precision Audience Engineering: We conduct deep demographic and psychographic research to build custom target audiences. This includes setting up Core Audiences (based on interests and behaviors), Custom Audiences (website visitors or email lists), and Lookalike Audiences to find new potential buyers.

Campaign Architecture & Structuring: We build the optimal campaign hierarchy within the ad manager (Campaign > Ad Set/Ad Group > Ads). This structural organization ensures your budget is distributed efficiently and makes future data analysis clear and actionable.

Budget & Bidding Strategy: We configure the most cost-effective bidding strategies (e.g., Target CPA, Maximize Conversions, or Target ROAS) and implement strict daily or lifetime budget caps so you never accidentally overspend.

A/B Testing Frameworks: We structure your ad sets to accommodate split testing. This allows the platform algorithms to test multiple variations of headlines, copy, and graphics against each other to automatically favor the highest-converting assets.

Compliance & Policy Check: We review your ad copy and landing pages to ensure they strictly comply with the notoriously complex advertising policies of Meta, Google, or LinkedIn, preventing your ad accounts from being suddenly restricted or banned.

TERMS & CONDITIONS

- Advertising involves direct financial integrations with third-party networks. To protect your budget and ensure total transparency, Walktopus operates under the following ad setup terms:
- **Payment Structure:** A non-refundable upfront deposit of 50% is required to initiate audience research and strategy. The remaining 50% balance is due upon your final approval of the campaign architecture, immediately prior to activating the live ads.
- **Exclusion of Ad Spend:** The quoted fee (₹5,000 - ₹15,000) strictly covers Walktopus's labor for strategic planning and technical setup. It does not include the actual advertising budget. All ad spend is billed directly to the client's credit card by the respective platform (Meta, Google, LinkedIn).
- **Asset Provision:** This service focuses on technical setup and strategy. The client is responsible for providing the actual visual assets (images, videos) and landing pages unless they have separately purchased Walktopus graphic design or video production packages.
- **Ad Account Ownership:** Clients must create their own Business Manager and Ad Accounts, to which Walktopus will be granted "Agency" or "Partner" access. This guarantees that the client always retains full ownership of their historical pixel data and account access.
- **Intellectual Property (IP):** Walktopus (operating as a fully-owned subsidiary of DGEN Technologies Private Limited) retains ownership of our proprietary audience research matrices and scaling frameworks. Upon full payment, the client retains full rights to the specific campaign structures built within their ad accounts.
- **Exclusion of Ongoing Management:** This package covers the one-time, initial setup and launch of the campaign. Once the campaign is published, ongoing daily monitoring, turning off underperforming ads, and scaling winning ad sets are not included. (Ongoing optimization requires a separate Walktopus Ad Management Retainer).
- **Performance Disclaimer:** While Walktopus implements proven targeting strategies and industry best practices, we cannot legally guarantee specific Return on Ad Spend (ROAS), Cost Per Click (CPC), or sales volumes, as market variables and platform algorithms are entirely outside our control.

PRODUCT PHOTOSHOOT

₹8,000 - ₹20,000

At Walktopus, we know that online, your product's image is your product. Customers cannot touch, feel, or test your items through a screen, which means their purchasing decisions are driven entirely by visual presentation. Our Product Photoshoot service is designed to elevate your brand's perceived value. We combine professional lighting, creative styling, and meticulous post-shoot retouching to produce high-resolution, scroll-stopping imagery that not only showcases your products beautifully but actively drives conversions.

STANDARD FEATURES :-

Whether you need crisp e-commerce catalog shots or dynamic lifestyle imagery, our photography process is structured to deliver flawless results. The standard Walktopus Product Photoshoot package includes:

Pre-Shoot Strategy & Mood Boarding: We do not just start snapping pictures. We collaborate with you to define the visual direction, color palette, and styling requirements to ensure the final images align perfectly with your brand identity.

Professional Lighting & Equipment: We utilize high-end DSLR/Mirrorless cameras, premium lenses, and professional studio strobe lighting to ensure every texture, label, and detail of your product is captured in ultra-high definition.

Creative Art Direction & Styling: Our team meticulously arranges your products, utilizing standard studio backdrops, complementary props, and dynamic compositions to create visually engaging and commercially viable images.

Expert Post-Production Retouching: Raw photos are only half the battle. We perform extensive post-shoot editing, including color correction, contrast adjustment, dust and blemish removal, and background clean-up (or complete background removal/clipping paths) to make the products look flawless.

Optimized File Delivery: You receive a curated gallery of the final, polished images in multiple formats. We provide high-resolution files suitable for large-scale printing, as well as compressed, web-optimized versions ready for instant upload to your website or social media.

TERMS & CONDITIONS

- A commercial photoshoot involves careful logistical planning and physical asset management. Walktopus operates under the following terms to ensure a smooth production process:
- **Payment Structure:** A non-refundable upfront deposit of 50% is required to lock in the shoot dates and begin pre-production planning. The remaining 50% balance is due upon your approval of the final watermarked gallery, immediately prior to the release of the high-resolution, unwatermarked image files.
- **Product Logistics & Shipping:** The client is entirely responsible for the cost and logistics of securely shipping or delivering the physical products to the Walktopus studio prior to the shoot date. Following the shoot, the client is responsible for arranging the return shipping of the items.
- **Prop & Model Budgets:** The quoted service fee covers standard studio backdrops and basic styling elements. If the creative brief requires specialized props (e.g., specific fresh ingredients, custom-built set pieces) or professional human models/hand models, these will be scoped and billed as additional expenses.
- **Included Revisions:** The package includes 1 round of post-production retouching revisions on the selected final images (e.g., adjusting a color tone or removing a specific reflection).
- **Reshoot Policy:** If the final images accurately reflect the approved pre-shoot mood board and strategy, any client requests for a completely new creative direction or physical reshoot will be treated as a brand new project and billed accordingly.
- **Intellectual Property (IP) & Usage Rights:** Walktopus (operating as a fully-owned subsidiary of DGEN Technologies Private Limited) retains ownership of all unedited raw files (e.g., RAW, CR2) and outtakes. Upon full and final payment, the client receives an exclusive, perpetual, and global commercial license to use the final edited images across all digital and print mediums.
- **Portfolio Rights:** Walktopus reserves the right to showcase the final retouched product images and behind-the-scenes production content in our agency portfolio and marketing materials.

FESTIVE/PROMO CAMPAIGN

₹8,000 - ₹20,000

Whether it is a massive Diwali flash sale, an end-of-financial-year clearance, or a specialized product launch, holiday and promotional periods are high-stakes environments. Attention is scarce, and competition is fierce. At Walktopus, our Festive/Promo Campaign service is engineered to cut through the noise. We deliver a cohesive, time-sensitive marketing push that combines thematic visual graphics, urgency-driven promotional copy, and a short-term rollout strategy designed to maximize your seasonal sales and capture high-intent buyers.

STANDARD FEATURES :-

A successful promotion is not just a single post; it is a calculated sequence of events. Our standard promotional campaign package equips you with everything needed for a high-impact launch:

Thematic Campaign Strategy: We develop a unique, compelling angle for your promotion that aligns with the specific festival or event while staying true to your core brand identity.

Cohesive Graphic Suite: We design a unified set of visual assets. This typically includes a primary hero banner (for your website or email newsletter) and a series of matching social media graphics, ensuring your promotion looks identical across every touchpoint.

Urgency-Driven Copywriting: We craft the textual elements of your campaign, focusing on high-conversion psychological triggers. This includes catchy headlines, persuasive social media captions, and clear, unmissable Call-to-Action (CTA) phrases.

Multi-Platform Adaptation: We resize and format your campaign assets to fit exactly where they need to go—from vertical Instagram Stories and Reels covers to horizontal Facebook ads and LinkedIn posts.

Strategic Rollout Plan: We provide a short-term publishing roadmap. This dictates exactly when to post the "Teaser," the "Official Launch," the "Mid-Sale Reminder," and the high-urgency "Final Hours" alerts to maintain momentum throughout the campaign window.

TERMS & CONDITIONS

- Because festive and promotional campaigns are strictly tied to calendar dates, Walktopus operates under specific terms to guarantee everything is launched on time:
- **Payment Structure:** A non-refundable upfront deposit of 50% is required to lock in the campaign timeline and begin the creative ideation phase. The final 50% is due upon approval of the campaign suite, prior to the handover of all final digital files.
- **Strict Timeframes & Responsiveness:** Due to the time-sensitive nature of holiday marketing, prompt feedback is mandatory. Clients must provide feedback on initial concepts within 24 to 48 hours. Walktopus is not responsible for missed holiday launch windows if the project is delayed by slow client communication.
- **Included Revisions:** The package includes up to 2 rounds of revisions on the campaign's core visual concept and promotional copy. Once the core concept is approved and we begin resizing assets for different platforms, requests for entirely new design directions will be billed at our standard hourly rate.
- **Intellectual Property (IP):** Walktopus (operating as a fully-owned subsidiary of DGEN Technologies Private Limited) retains ownership of the raw design files and unselected promotional concepts. Upon full payment, the client receives exclusive rights to use the finalized campaign assets across all digital and physical channels.
- **Media Spend & Execution Exclusions:** This service covers the strategy, copywriting, and graphic design of the campaign assets. It does not include the advertising budget required to run the ads, nor does it include the manual labor of scheduling posts and managing ad managers (unless bundled with our Ad Campaign Setup or Website Management services).
- **Promotional Mechanics:** The client is entirely responsible for the backend logistics of their promotion. This includes setting up the actual discount codes on their e-commerce platform, ensuring sufficient product inventory, and honoring the advertised prices.

INFLUENCER COORDINATION

₹10,000 - ₹30,000

Influencer marketing can be one of the most explosive growth channels for your brand, but managing it internally is often a logistical nightmare. Sifting through fake followers, negotiating rates, and chasing down late deliverables can drain your team's time. At Walktopus, our Influencer Coordination service provides complete, end-to-end management of your influencer campaigns. We act as the dedicated liaison between your brand and the creators, handling everything from initial discovery and outreach to rigorous deliverable tracking, ensuring you get authentic content and a measurable return on your investment.

STANDARD FEATURES :-

We treat influencer marketing as a highly structured performance channel, not a gamble. The standard Walktopus Influencer Coordination package includes:

Discovery & Vetting: We do not just look at follower counts. We utilize advanced tools to thoroughly audit potential influencers, checking for authentic engagement rates, audience demographics, and brand safety to ensure they align perfectly with your target market.

Outreach & Communication: We handle the entire communication pipeline. We draft personalized pitch emails, manage direct messages, and handle all the necessary follow-ups to secure partnerships with high-demand creators.

Rate Negotiation & Contracting: Our team leverages industry benchmarks to negotiate the most cost-effective rates on your behalf. We also draft and execute clear, legally binding agreements outlining exact deliverables, timelines, and usage rights.

Creative Brief Creation: We design comprehensive creative briefs for the influencers. This ensures they understand your brand guidelines, key talking points, mandatory tags, and the specific Call-to-Action (CTA), while still allowing them the creative freedom to resonate with their specific audience.

Deliverable Tracking & Quality Assurance: We monitor the entire production timeline. We review draft content for approval before it goes live, ensure the influencer posts exactly when scheduled, and verify that all tags, links, and hashtags are executed flawlessly.

Campaign Reporting: At the end of the campaign, we compile the analytics from all participating influencers (reach, impressions, clicks, and engagement) into a consolidated performance report.

TERMS & CONDITIONS

- Working with independent creators introduces external variables. Walktopus operates under the following terms to protect your brand and ensure campaign smooth execution:
- **Agency Fee vs. Influencer Budgets:** The quoted fee (₹10,000 - ₹30,000) is strictly the Walktopus agency management fee for our labor and coordination efforts. It does not include the actual compensation paid to the influencers. The client is responsible for establishing a separate influencer payout budget or providing the necessary free products for barter collaborations.
- **Payment Structure:** A non-refundable upfront deposit of 50% of the agency fee is required to begin the discovery and outreach phase. The remaining 50% is due upon the successful launch of the campaign, prior to the final performance reporting.
- **Influencer Payout Logistics:** All direct financial compensation agreed upon with an influencer must be funded by the client. Walktopus will facilitate the invoicing process, but the client is responsible for releasing the funds directly to the creators (or to Walktopus in advance to be held for disbursement) upon the completion of their deliverables.
- **Product Seeding & Shipping:** For barter campaigns, the client assumes full responsibility for the cost, packaging, and timely shipping of the physical products directly to the vetted influencers.
- **Unresponsive Creators ("Ghosting"):** While we rigorously vet all partners and enforce contracts, independent influencers can occasionally become unresponsive or fail to meet deadlines. Walktopus will make every professional effort to enforce the contract or secure a replacement creator, but we are not legally liable for the breach of contract committed by an independent third party.
- **Intellectual Property (IP) & Usage Rights:** Walktopus (operating as a fully-owned subsidiary of DGEN Technologies Private Limited) ensures that basic social media posting rights are secured in the influencer contracts. However, if the client wishes to use the influencer's content for extended commercial purposes (e.g., running the video as a paid Facebook ad or putting it on a billboard), additional licensing fees may be required by the creator.
